**Advantage Security Consultants, LLC develops Neighborhood Crime Information service for homebuyers, Real Estate Agents, Business owners, and Mortgage lenders**

Advantage Security Consultants, LLC a Rhode Island partnership announced a new service to provide address and neighborhood specific crime information to homebuyers, Real Estate brokers, and Mortgage lenders. According to Managing Partner Joseph Broadmeadow, the service is designed to "allow a buyer or broker to analyze the level of criminal activity in a neighborhood, be aware of any Sexual Offenders that may be nearby, and develop a better picture of the particular level of risk within a specific area. Uniform Crime Reports (UCR), published by the FBI, which are typically used as a "crime report" provided by Real Estate brokers, are not meaningful to specific areas. UCR are general to the jurisdiction but do not accurately reflect the incidence of crime within a neighborhood. "

"We provide address and neighborhood specific information to assist buyers in making an informed decision of the particular risk when making a choice to move to or open a business in a particular area."

ASC provides sophisticated private investigative services, litigation support, security evaluations of business operations and private residences, services to implement security policies, and programs to protect people, places, employees, and business assets.
